EDUCATION

Bachelor of Art Political Science

University of California, Irvine

2013 - 2017

SKILLS

HTML

CSS

JavaScript

React

Bootstrap

Git

GitHub

Profile

I am a self-taught front-end web developer that began learning in early 2019 to transition out of administration roles. I am passionate about building websites and applications that solve real world problems. I love how every day is an opportunity to learn something new when it comes to web development. My goal is to continue learning front-end technologies such as React and dive into more UX / UI design.

Projects

Palette Picker – a color palette web application made using React. Users can select premade color palettes or create their very own. Users can also change the brightness or darkness of the palettes using a navigation slider.

Kanye Says – A Kanye West quote generator made using React. Generate quotes from Kanye and upvote or downvote them to change his facial expression.

Lien Cakes – Fictional cake bakery website highlighting specialty cakes. Website made using HTML, CSS, and Bootstrap.

Last Drop Coffee - Fictional coffee shop website with a single page design. Website made using HTML, CSS, and JavaScript.

Premrajan Tutoring - Tutoring services website for a client. Client asked for a very minimal website with straightforward information and navigation. Website made using HTML, CSS, and fullpage.js library for smooth page transitions.

Employment History
